REGISTRIES IN 120 JURISDICTIONS

Our Approach

The C4ADS mission is to build a world more capable of targeting and dismantling illicit activity wherever it may be – and we know that we are stronger when we share, build, and grow with partners across every sector, from government and civil society to the private companies and financial institutions.

Our impact-focused approach is built from years of training and collaborating with global partners on our analytical methodologies, bespoke tools, and unique data. As a result, we can provide actionable, modularized trainings for both small and large groups, in person and in virtual environments, and even in different languages.

The C4ADS Learning Lab is a hands-on experience that prioritizes developing tangible skills. Our goal is to help build more agile teams that have the confidence to apply innovative analytical approaches long after their time with us.

Tailor Your Program

Core Modules

PAI Analysis Basics

Data Literacy

Data Analytical Techniques

Digital Security

Corporate Data

Trade Data

Maritime Domain Awareness

Air Domain Awareness

Satellite Imagery
